Professional Experience

Data and Monitoring Officer
Yangon, Myanmar

Gender and Development Institute
October 2022 - The Present

- Lead the development of project M&E plan to track project progress and measure success.
- Develop database, indicator tracking table, and reporting templates to support systematic data collection, effective indicator tracking, and consistent reporting.
- Design community feedback mechanism tools, oversee systematic feedback collection, and analyze data to inform program improvements and strengthen accountability to affected communities.
- Lead and execute remote and in-person monitoring visits to implementing partners (IPs) to ensure effective delivery of project activities.
- Provide evidence-based insights and recommendations for program decision-making and timely correction.
- Ensure data quality by leading data completeness checks, data validation, and systematic data entry.
- Design and facilitate capacity building trainings for IPs in M&E, data management, and reporting.
- Document project outcomes, success stories, and best practices in donor quarterly grant narrative report to showcase project achievements and lessons learned.
- Author data collection, reporting, and digital security guidelines for IPs.

Program Officer
Yangon, Myanmar

Myanmar Red Cross Society
January 2020 – August 2020

- Supervised Assistant Project Officer and Red Cross volunteers in designing and implementing the disaster preparedness and response capacity-building activities.
- Conducted data collection and performance monitoring using project indicators.
- Utilized KoBo Toolbox to assess community and volunteer awareness regarding COVID 19 transmission, prevention, and response.
- Prepared monthly and quarterly progress reports with data analysis and key findings for submission to the Project Coordinator.

Township Project Coordinator
Yangon, Myanmar

Myanmar Health Assistant Association
August 2018 – December 2019

- Provided technical guidance to Self-help Groups (SHGs), located in Hlaingthaya Township, in the delivery of high-quality TB case finding, contact investigation, referrals, DOTS, infection prevention and control services, and awareness raising campaigns.
- Conducted regular data analysis to identify trends and performance gaps, recommending timely corrective actions.
- Developed databases, monitoring tools, and reporting formats in collaboration with the M&E team.
- Led data validation and data cleaning to ensure accuracy and reliability.
- Conducted routine monitoring visits and quality assurance checks, supporting SHGs in meeting project standards.
- Produced high-quality monthly and quarterly reports to communicate project results and progress to the Senior Management Team.
- Delivered trainings to strengthen SHG capacity in data management, analysis, and report writing.

Project Assistant
Yangon, Myanmar

World Vision
March 2016 – December 2017

- Conducted regular monitoring and supervision visits to field teams, ensuring quality implementation of project activities.
- Designed and implemented Routine Data Quality Assessments (RDQAs) and provided coaching for improved data accuracy.
- Ensured completeness and correctness of field reports and supported data entry into the database.
- Produced data analysis and relevant information to Project Manager for the hight quality submission of M&E and project progress reports.
- Assisted in maintaining project databases, tracking indicators, and updating the M&E plan.

Health Assistant
Namtu and Hsipaw, Myanmar

Myanmar Medical Association
June 2015 – October 2015

- Achieved the expected results of the Malaria project as the field office in-charge.
